Letter of Recommendation

To Whom it may concern,

I am delighted to write this letter of recommendation for Patrícia Szabó. I have had the privilege of supervising Patrícia from her BSc through her MSc and PhD studies, during which I witnessed her continuous growth into an independent and accomplished researcher.

Patrícia earned both her BSc in Business Informatics (2019) and MSc in Computer Science Engineer with a specialization in medical applications (2022) at the University of Pannonia. In September 2025, she successfully defended her PhD dissertation in Information Science and Technology at the same institution, where her research focused on the intersection of **health informatics, virtual reality, and game development for cognitive development and rehabilitation**.

Her research contributions are notable both in scope and impact. She has developed rehabilitation and educational applications addressing diverse challenges such as fine motor rehabilitation, diabetes education, memory testing, speech therapy for patients with aphasia and other neuropsychological rehabilitation programs. Collaborating with psychologists, neuropsychologists, and medical professionals, she has played a key role in interdisciplinary projects with Eötvös Lóránd University, Semmelweis University, and the Veszprém Hospital. Her work has already led to **peer-reviewed journal articles and multiple international conference presentations**, showcasing both her scientific commitment and her drive to make tangible contributions to healthcare innovation.

Equally impressive is her dedication to teaching and mentorship. At the Department of Electrical Engineering and Information Systems, she has taught courses in Multimedia, Virtual Reality, and Mobile Programming, while also supervising numerous theses and guiding multiple student project works. Her ability to inspire and support students highlights her strong dedication to education and her natural talent as a mentor.

Patrícia's professional activities extend well beyond her home institution. She is an active member of several **COST Action networks (European Cooperation in Science and Technology)**, serving as working group member, and also as a *Science Communication Coordinator* in one of them. She has represented her work at numerous international event, in 2024, she successfully won the womENcourage grant in the field of 'Responsible Computing for Gender Equality,' which enabled her to participate in the conference in Madrid and present her work, which is further demonstrates her commitment to scientific excellence, inclusivity, and international collaboration.

In summary, Patrícia Szabó is an exceptionally talented and motivated young researcher whose interdisciplinary expertise, research achievements, and dedication to teaching make her a valuable contributor to any academic or research environment. I wholeheartedly recommend her, confident that she will continue to make meaningful contributions wherever she pursues her career.

Please do not hesitate to contact me if you require any additional information about Patricia's contribution.

Yours sincerely,

A handwritten signature in blue ink, reading "Cecilia Sik-Lanyi".
